Welcome

Espace Vitalité Chenot is a health and wellness spa where guests can experience Chenot Method™ health and vitality programmes, beauty treatments, as well as fitness and wellness facilities to help them relax, restore and rejuvenate during their stay.

We live in an environment that is continuously changing. Pollution, consumption of processed foods, lack of physical activity, stress, along with unhealthy habits and lifestyle can contribute to the accumulation of toxins within the body that, with time, can gradually reduce organ functionality and increase damage.

Visit Espace Vitalité Chenot and restore energy, vitality and beauty.

In a tranquil setting we apply our state-of-the-art treatments and wellbeing programmes based on the renowned Chenot Method™, promoting optimal health whilst rebalancing body and mind.

The Chenot Method™

The Chenot Method™ combines the principles of traditional Chinese healing with the latest scientific advances in regenerative, anti-ageing and preventative medicine, including state-of-the-art diagnostic technologies. All treatments of the Chenot Method™ use the Chenot professional and cosmetic products.

HYDRO BIONTOLOGY DEPARTMENT

AESTHETIC DEPARTMENT

WELLNESS DEPARTMENT

HYDROTHERAPY DEPARTMENT

Personalised by Chenot, this particular hydrotherapy is a signature feature of the Method. The variations in water temperature and pressure achieved by most advanced bathtubs combined with the Chenot essential oils added help improve the circulation of body fluids, eliminate toxins and fat deposits from skin tissues, reduce psychophysical stress and muscular tension. Therapeutic value is enhanced by the application of body wraps of organic clay enriched with microalgae and pure essential oils according to your Individual's need, in order to assure body detoxification and relaxation. The final hydro-energetic treatment, consisting of a jet of water directed over predetermined energetic points, will complete the therapy.

HYDRO-AROMATHERAPY

This is a particular type of hydro-massage in which a special mixture of essential oils is added to the bathwater. The variations in the water temperature and pressure are essential, and combined with the thermodynamic effect of plant extracts, cause the dilation and constriction of the capillaries. This action stimulates the natural physiological functions to remove toxins and fat deposits from the skin tissue.

It also combats the effects of skin ageing by favoring spontaneous cell regeneration, improves skin appearance and its overall peripheral blood and lymphatic circulation. The hydro-aromatherapy is a genuine rehabilitative treatment that tones and strengthens the skin, balances the body fluids and energy, and relaxes both body and mind.

PHY TO-MUD THERAPY

This involves the application of a body wrap consisting of a mixture of white or green clay enriched with microalgae and pure essential oils, and is the second step of the hydro-energetic treatment. The combined effect of essential oils and minerals further drain, detoxify and revitalise the body depending on the application time, and is helpful to eliminate physical, muscular as well as emotional stress tension.

HYDRO-JET TREATMENT

In this final treatment, a pressure-jet adds a cold and hot mechanical stimulus to the thermal action to improve the toning and firming effect of the skin, increase the metabolic rate, and further improve the peripheral circulation, restoring the energy and vitality of the body.

AESTHETIC DEPARTMENT

These exclusive treatments have been designed using the principles of the Chenot method™, by applying specially formulated essential oils and mineral blends to cleanse the body and face from impurities, to increase energy levels and to promote an extraordinary sense of wellbeing. The aim of these treatments is to create a balanced body and mind, using non-invasive methods where youthfulness is created in perfect harmony.
